

Life's journey begins with  
the first step.

For those with  
foot drop, the path just  
became a whole lot easier.

WalkAide has heralded a bright new day in the treatment of foot drop – a day in which simplicity, freedom and functionally attractive design are delivered in an affordable, easy-to-use device.

The 2009 Training Course focuses on the recently released WalkAnalyst Version 2.1 Technical & Marketing Package. This intuitive, user friendly software upgrade simplifies data collection and device programming of the WalkAide to ease integration into your clinical practice while expanding the patient treatment populations.

Previously trained practitioners may wish to enroll in the "Continued Concepts of the WalkAide System" **Workshop #10 on Wed. Mar. 4<sup>th</sup>** (8:30 -12:30 in the Madison Room) at the 35th Academy Annual Meeting & Scientific Symposium in Atlanta, GA.
