

e n g i n e e r e d s i m p l i c i t y

Complex engineering has produced a simple solution for trans-tibial suspension.

The Durasleeve™ air-tight hypobaric suction environment is virtually fail-safe.

Constructed of the highest quality neoprene, Durasleeve™ is designed for durability.

To meet the needs of exceptionally active clients, consider the security and economy of our special heavy-duty sleeve.

Durasleeve™ requires no seminars and, with so many choices, is the simplest and most effective one. Its unmatched quality, proven reliability and competitive prices again make your clients successful and is why more and more prosthetists use Durasleeve™ for cost-effective ease of use and comfort.

Durasleeve™, another solution from the prosthetists and manufacturers of the Original TES Belt™.

Back of knee contouring reduces bunching for increased comfort

Inside, the neoprene lining is glued for uncompromised, air-tight integrity.

Outside, the reinforced, color-matched, blind-stitching assures a sturdy sleeve

Our exclusive, patented friction-control panel between the socket and sleeve minimizes wear on the primary sleeve material while minimizing bulk

Preflexed knee design is naturally shaped with no seams for reduced pressure on the patella

DURASLEEVE™

U.S. Patent No. 4,822,371

Syncor Ltd.
