

# The Premier Choice For Unloading

## Toad Anti-Gravity Brace (TAG Brace)

- Light-weight
- Comfortable
- Increases compliance
- Cost effective
- L-Code reimbursement
- No tourniquet effect

Utilizing patented prosthetic suspension technology, the custom Toad Anti-Gravity (*TAG*) Brace completely unloads the foot and ankle complex and eliminates pressure and shear which has been proven successful on patients that weigh up to 530 lbs! The *TAG* Brace has the ability to heal the most stubborn of foot ulcerations.

The *TAG* Brace is also the premier choice for lower limb fractures and reconstructions that require unloading such as distal tibia, foot, ankle and metatarsal fractures.

By enabling the patient to ambulate during recovery time without the need for crutches, muscular atrophy is dramatically reduced while allowing the patient to apply weight to the rest of the skeletal structure to maintain density and stability.

“I believe that with modern wound care techniques coupled with next-generation offloading technology such as Toad Medical's Anti-Gravity Brace, we can dramatically reduce the severity of wounds and amputations, worldwide”.

David G. Armstrong, DPM, MD, PhD  
Professor of Surgery and Director  
Southern Arizona Limb Salvage Alliance (SALSA)  
University of Arizona College of Medicine
