

i-limbtm quantum

“A prosthesis I can control with just one simple movement. It’s a game changer – just like me!”

Rebekah Marine - Bionic Model

i-limbtm quantum

the first multi-articulating prosthesis that can be controlled with simple gestures.

smarter – use simple gestures to change grips

faster – boost digit speed by up to 30 %

stronger – up to 30 % more power when needed

and now available in 4 sizes (extra small, small, medium, large)

find out more about gesture control using Touch Bionics' patented *i-mo*TM technology
