

Knee bracing isn't all we do.

Premier Ankle Brace Series

Exceptional control, reliable turnaround times, and a wide range of configuration options make the Premier Ankle Brace a very viable option for PTTD, chronic ankle instabilities and other patient mobility challenges.

If you are using traditional plastic and/or leather custom ankle braces, Townsend's pre-preg carbon fiber braces provide superior control. Premier Ankle braces can be adjusted to limit inversion and eversion WITHOUT restricting plantarflexion or dorsiflexion. The low profile, appealing design enhances patient

compliance – and the qualifying billing codes can enhance your financial margins, too.

Custom fabricated (from a cast or digital leg scan) in only four business days, the Premier Ankle Brace is helping O&P practitioners achieve outstanding patient results. Ease of application, more comfort, less pain, and increased mobility.

For more information, please speak with your Townsend representative or download product details from our web site: www.townsenddesign.com

Patient Results*

- 86% of patients reported a reduction in pain, with 79% indicating significant pain relief

Among patients who previously wore a custom ankle brace...

- 83% said the Townsend brace was more comfortable
- 80% said it provided more control and was faster/easier to put on

*25 patients treated and independently surveyed by a certified orthotist
