

Aerospace quality adapters,

at prices that aren't sky high.

You're assured premium-quality modular adapters with Seattle Systems. Because we combine the same titanium and aluminum used in the space shuttle, space station and airplanes with the use of precision computer numerically controlled machinery. We maintain all tolerances to within .005". This precision is maintained throughout the entire product line from pediatric to 366-pound adults. Seattle Systems also applies Dacromet® coating to all set screws. This attention to detail drastically reduces screw corrosion, binding and galling. Not only that, our modular components are subject to rigorous ISO 10328 test standards to substantiate and ensure patient safety over time.

New Pricing.
reduced up to
50%

We're now offering the same high quality adapters you've come to expect from Seattle Systems at much lower costs. As of today, all of our adapters have been reduced from 20% to 50%. So call on us today. And find prices — and account representatives — that are down to earth.
