

CONSERVATIVE INTERVENTION FOR THE GROWING CHILD WITH A CHALLENGING NEUROLOGICAL or CONGENITAL PRESENTATION

Maintain and increase muscle length through precise dynamic stimulus and proper posturing

Ultraflex is designed to be part of a comprehensive treatment program to help patients with challenging presentations to attain goals that improve quality of life.

Common goals include:

- Maintain and increase muscle length during growth
- Improve range of motion
- Delay more aggressive intervention
- Improve function: gait, grasp, pinch, and release

Upper and lower therapeutic/stretching bracing solutions for:

- Spasticity (from a cerebral origin - Cerebral Palsy, TBI, CVA)*
- Duchenne muscular dystrophy*
- Brachial Plexus Injury*
- Spina Bifida*
- Arthrogryposis*
- SCI*

Ultraflex Custom Molded EWHO Rotation

Ultraflex Custom Molded AFO

Give your patients the bracing solution that extends treatment time and the treatment setting into the home.
