

*“Walking naturally is easier with better control and no tiredness or pain.”*

## DON'S PATIENT INSPIRED SOLUTION

Don's history includes acute poliomyelitis in childhood with no adverse side effects until 2003 when he began experiencing falls. In 2007, Don was fitted with an Ultraflex Adjustable Dynamic Response™ (ADR™) left KAFO and right AFO. At the time, Don was looking for relief from problems with fatigue associated with activity, knee buckling and falls, and pain in the Achilles region. Within three days of wearing his new Ultraflex ADR™ functional/ daytime orthoses, Don reported relief of lower leg discomfort and pain. To date, Don's results include improved heel rocker at initial contact, no falls, and a more natural gait with greater flexibility.
